"In sending out this curriculum, the Committee desires to emphasize afresh its hope that there will be no failure to understand its purpose. It is not offered as a "model" curriculum. There are many improvements which we would gladly introduce if we could see any possibility of putting them into effect at the present time. Moreover, the Committee is not urging the unqualified adoption of this curriculum in training schools generally ... There is little doubt that the next few years will see many new developments along nursing lines. It is the intention of the Committee to keep the curriculum up to date by frequent revision, and so supplement the material in this first edition from time to time."—Introd.
